CONTENTS OF VOLUME 216

No. 1. *July* 1971

PAGE

The significance of changes in the temperature of the skin and body core of the chicken in the regulation of heat loss. By S. A. Richards 1

Amino acid metabolism in the isolated perfused rat liver. By Margaret Kerly and Joy E. L. Spruyt 11

Effects of cold, eating, efferent nerve stimulation and angiotensin on heart rate in sheep before and after autonomic blockade. By F. L. Hays and A. J. F. Webster 21

Binocular interaction fields of single units in the cat striate cortex. By P. O. Bishop, G. H. Henry and C. J. Smith . . 39

Sex differences in the changes in sympathetic nerve activity when arterial pressure is raised by infusion of angiotensin and noradrenaline. By J. F. B. Morrison and Mary Pickford . . 69

Synaptic transmission in the superior cervical ganglion of the cat after reinnervation by vagus fibres. By B. Ceccarelli, F. Clementi and P. Mantegazza 87

The Purkinje shift in cat: extent of the mesopic range. By P. Hammond and C. R. James 99

Coronary blood flow, oxygen delivery rate and cardiac performance. By Marvin B. Bacaner, Franco Lioy and Maurice B. Visscher 111

Formation of saliva and potassium transport in the perfused cat submandibular gland. By O. H. Petersen 129

The function of the paramedian reticular nucleus in the control of heart rate in the cat. By F. R. Calaresu and M. R. Thomas . 143

Pepsin secretion, gastric motility and mucosal blood flow in the anaesthetized cat. By J. D. Reid and D. J. Sanders . . . 159

Effects of nerve cross-union on rat intracellular potassium in fast-twitch and slow-twitch rat muscles. By J. F. Y. Hoh and B. Salafsky 171

The heat of shortening during the plateau of tetanic contraction and at the end of relaxation. By X. Aubert and J. Lebacq . 181

The accumulation of [^{14}C]5-hydroxyindol-3-ylacetic acid by the rabbit choroid plexus *in vitro*. By I. A. Pullar 201

PAGE

Catecholamines and 5-hydroxytryptamine in nervous tissue of cephalopods. By A. V. Juorio 213

Plasma oxytocin concentration and paraventricular neurone activity in rats with diencephalic islands and intact brains. By R. E. J. Dyball and R. G. Dyer 227

On the presynaptic acetylcholine receptor in sympathetic ganglia of the frog. By B. L. Ginsborg 237

Movement of choline acetyltransferase in axons disconnected from their cell bodies. By J. Ekström and N. Emmelin . . . 247

No. 2. *July* 1971

The short-latency projection from the baboon's motor cortex to fusimotor neurones of the forearm and hand. By J. F. M. Clough, C. G. Phillips and J. D. Sheridan 257

The effects of hypercapnia, hypoxia and ventilation on the baroreflex regulation of the pulse interval. By J. D. Bristow, E. B. Brown Jr., D. J. C. Cunningham, R. C. Goode, M. G. Howson and P. Sleight 281

The flow of juice from the pancreatic gland of the cat in response to vagal stimulation. By Sven Lenninger and P. Ohlin . . 303

Effects of abrupt load alterations on force–velocity–length and time relations during isotonic contractions of heart muscle: load clamping. By D. L. Brutsaert, V. A. Claes and E. H. Sonnenblick 319

Age changes in cross striated muscle of the rat. By E. Gutmann, V. Hanzlíková and F. Vyskočil 331

Removal of an insulin inhibitor from the rat heart by perfusion. By D. A. B. Young 345

Evidence against adrenergic motor transmission in the guinea-pig vas deferens. By N. Ambache and M. Aboo Zar 359

Competitive interaction of β-guanidino propionic acid and γ-aminobutyric acid on the muscle fibre of the crayfish. By Anne Feltz 391

On the nature of the oscillations of the membrane potential (slow waves) produced by acetylcholine or carbachol in intestinal smooth muscle. By T. B. Bolton 403

PAGE

Recurrent inhibition of fusimotor neurones exhibiting background discharges in the decerebrate and the spinal cat. By P. H. ELLAWAY 419

The paramedian reticular nucleus: a site of inhibitory interaction between projections from fastigial nucleus and carotid sinus nerve acting on blood pressure. By MITSUHIKO MIURA and DONALD J. REIS 441

Modification of the reflex response to stimulation of carotid sinus baroreceptors during the following stimulation of the hypothalamic defence area in the cat. By P. W. HUMPHREYS, N. JOELS and R. M. MCALLEN 461

The plantar cushion reflex circuit: an oligosynaptic cutaneous reflex. By M. DAVID EGGER and PATRICK D. WALL 483

The effect of prolonged depolarization on synaptic transfer in the stellate ganglion of the squid. By B. KATZ and R. MILEDI . 503

No. 3. *August* 1971

Configuration dependence of scotopic spatial summation. By B. SAKITT 513

Studies of temporal frequency adaptation in visual contrast sensitivity. By ROBERT A. SMITH JR. 531

A comparison of the spindles in two different muscles of the frog. By M. C. BROWN 553

Factors in cerebrospinal fluid from goats that affect sleep and activity in rats. By V. FENCL, G. KOSKI and J. R. PAPPENHEIMER 565

The effect of temperature change upon transmitter release, facilitation and post-tetanic potentiation. By J. I. HUBBARD, S. F. JONES and E. M. LANDAU 591

Stimulation of amylase secretion from the perfused cat pancreas by potassium and other alkali metal ions. By B. E. ARGENT, R. M. CASE and T. SCRATCHERD 611

Studies on the translocation of noradrenaline-containing vesicles in post-ganglionic sympathetic neurones *in vitro*. Inhibition of movement by colchicine and vinblastine and evidence for the involvement of axonal microtubules. By P. BANKS, D. MAYOR, MARY MITCHELL and D. TOMLINSON 625

PAGE

The effect of quinine on tension development, membrane potentials and excitation-contraction coupling of crab skeletal muscle fibres. By H. HUDDART 641

Catecholine secretion by the adrenal medulla of the foetal and new-born foal. By R. S. COMLINE and MARIAN SILVER . . . 659

Intracellular concentrations of sodium, potassium and chloride in the lactating mammary gland and their relation to the secretory mechanism. By J. L. LINZELL and M. PEAKER 683

The permeability of mammary ducts. By J. L. LINZELL and M. PEAKER 701

The effects of oxytocin and milk removal on milk secretion in the goat. By J. L. LINZELL and M. PEAKER 717

Salt and water permeability of the epithlium of the coprodeum and large intestine in the normal and dehydrated fowl (*Gallus domesticus*). *In vivo* perfusion studies. By NIELS BINDSLEV and ERIK SKADHAUGE 735

Sodium chloride absorption and solute-linked water flow across the epithlium of the coprodeum and large intestine in the normal and dehydrated fowl (*Gallus domesticus*). *In vivo* perfusion studies. By NIELS BINDSLEV and ERIK SKADHAUGE 753

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

26–27 *March* 1971

SUBJECT INDEX

Acetylcholine, slow potential changes in smooth muscle produced by (guinea-pig), 403
Acetylcholine receptors, sympathetic ganglia and preeynaptic (frog), 237
Acetylcholine sensitivity, development in muscle of, 52*P*
Adrenal medulla, secretion of catecholamines by foetal and new-born (horse), 659
Adrenergic transmission, evidence against vas deferens motor, (rat) 359
Adrenergic vesicles, role of microtubules in movement (cat), 625
Adrenocorticotrophic hormones, control by corticosterone of secretion of, 74*P*
Age changes, striated muscle (rat), 331
Airway calibre, reflex control of, 33*P*
Amino acid, perfused liver metabolism of (rat), 11
Amino acids, entry into skeletal muscle of (rat), 34*P*
entry into myocardium of (rat), 64*P*
Aminobutyric acid, action on muscle fibres of γ-(crawfish), 391
Amylase, potassium stimulation of secretion of pancreatic amylase (cat), 611
Angiotensin, effect on heart rate of (sheep), 21
sex differences in response to blood pressure changes produced by, 69
Arterial muscle, effect of noradrenaline cold and calcium lack on, 31*P*
Autonomic block, factors affecting heart rate and (sheep), 21
Axonal movement, cell body axon disconnection and (rat), 247

Baroreceptors, hypothalamic defence area and responses to (cat), 461
Baroreflexes, effect of hypoxia and hypercapnia on pulse rate (man), 281
Binocular interaction, single striate units and fields of (cat), 39
Body temperature, heat loss regulation and (chicken), 1

Calcium, depolarization and phasic entry of (squid), 70*P*
Calcium permeability, effect of prolonged depolarization on presynaptic (squid), 503
Carbachol, slow potential changes in smooth muscle produced by (guinea-pig), 403
Cardiac action potential, comparison of (frog), 44*P*
Cardiac contraction, effect of cephalic and carotid sinus pressure on, 79*P*
Cardiac performance, O_2 supply coronary blood flow and (dog), 111
Carotid body, oxygen tension in (cat), 78*P*
Carotid sinus, central interactions of acting in nerve from (cat), 441
Catecholamines, nervous tissue content of (cephalopods), 213
secretion by adrenal medulla in foetus and new-born of (horse), 659
Cerebellum, supernormal period in parallel fibres of the, 59*P*
Cerebrospinal fluid, sleep-activity factors in goat (rats), 565
Chemospecific affinity, retention by nerve fibres of, 53*P*
Choline acetyltransferase, movement in axons of (rat), 247
regulation in presynaptic nerves of (mouse), 41*P*
Choroid plexus, accumulation of 5-hydroxyindol-3-ylacetic acid by (rabbit), 201
Cloaca, salt and water absorption in (chicken), 753
Cochlea, frequency and resolving power, 58*P*
Colchicine, inhibition of adrenergic vesicle movement in axons (cat), 625
Cold, effect on heart rate of (sheep), 21
Contrast sensitivity, frequency adaptation and, 531
Coprodeum, salt and water permeability of (chicken), 735
Coronary blood flow, O_2 supply cardiac performance and (dog), 111
Cortical activity, inter-hemispheric transfer of, 1*P*
Cutaneous reflex, plantar cushion, (cat), 483

Dehydration, effect on gut salt and water permeability of (chicken), 735
Depolarization, effect on synaptic transfer of prolonged (squid), 503

Eating, adrenaline release after injection of 6-hydroxydopamine and, (rat), 68*P*
effect on heart rate of (sheep), 21
Excitation-contraction coupling, effect of quinine on (crab), 641
Exercise, effect on non-athletic females of, 25*P*

Fastigial nucleus, interaction with carotid sinus nerve of activity from (cat), 441
Fluoroacetate, oral toxicity (rats), 40*P*
Frequency adaptation, contrast sensitivity and, 531
Fusimotor fibres, function and endings of (cat), 51*P*
Fusimotor neurones, projection from motor cortex to hand and forearm (baboon), 257
recurrent inhibition of (cat), 419

Gas sampling, integrating system for, 4*P*
Gastric centres, excitation input and, 75*P*
Gastric motility, pepsin secretion, blood flow and (cat), 159
Glucagon, permeability of placenta to (sheep), 63*P*
Guanidino propionic acid, action on muscle fibres of β-(crawfish), 391

Haematocrit, pressure changes and kidney effluent (dogs), 72*P*
Haemodynamics, computer model for teaching, 9*P*
Hand, projection from motor cortex to fusimotor neurones of (baboon), 257
Heart, removal of insulin inhibitor from (rat), 345
Heart muscle, load clamping in (cat), 319
Heart rate, the paramedian reticular nucleus and control of (cat), 143
Hippocampal responses, computer testing of day and night, 2*P*
Hippocampus, increases of synaptic influences in, 32*P*
Histamine, antigen stimulation of leucocytes and capacity to form, 67*P*
5-hydroxyindol-3-ylacetic acid, reaccumulation by choroid plexus of (rabbit), 201
5-hydroxytryptamine, nervous tissue content of (cephalopods), 213
Hypercapnia, effect on baroreflex pulse regulation of (man), 281
Hypothalamus, baroreceptor responses and defence area in (cat), 461
Hypoxia, effect on baroreflex pulse regulation of (man), 281

Insulin inhibitor, removal by perfusion from heart of (rat), 345
Ionic concentrations, lactation and mammary (guinea-pig), 683

Large intestine, salt and water permeability of (chicken), 735
Liver, amino acid metabolism in perfused (rat), 11
Load clamping, heart muscle (cat), 319

Magnesium, sodium dependant transport of (squid), 38*P*.
Mammary ducts, permeability of (goat), 701
Mammary gland, intracellular ionic concentrations in (guinea-pig), 683
Membrane potential, effect of quinine on (cat), 641
Micro-environment, particles in the human, 19*P*
Microtubules, role in movement of adrenergic vesicles (cat), 625
Milk removal, effect on milk secretion of (goat), 717
Milk secretion, effect of oxytocin on (goat), 717
Motor cortex, projection to fusimotor and neurones from (baboon), 257
Motor unit, post-tetanic effects in (cat), 26*P*
Mucosal blood flow, pepsin secretion motility and (cat), 159
Muscle, age changes in striated (rat), 331
intracellular potassium concentration in different types of (rat), 171
Muscle spindles, two types of (frog), 553

Nerve, feeding and development of, 71*P*
Nerve growth factor, multipotential cells and, 65*P*
Neural network, computer simulation of, 13*P*
Neuromuscular facilitation, effect of temperature (rat), 591
Neuromuscular junction, viewing in isolated muscle, 35*P*
Nociceptors, thermal, 77*P*
Noradrenaline, sex differences in response to blood pressure changes produced by, 69
uptake by adrenergic receptors in spleen of, 55*P*

Oesophageal muscle, multiple nerve endings in, 37*P*
Oxytocin, effect on milk secretion (goat), 717

Oxytocin, paraventricular neurone activity and plasma concentration of (rat), 227

Pancreas, potassium stimulation of secretion of amylase from (cat), 611
Pancreatic juice, vagal stimulation and flow of (cat), 303
Paramedian reticular nucleus, control of heart rate and the (cat), 143
fastigial and carotid sinus interaction in (cats), 441
Paraventricular neurones, plasma oxytocin concentration and activity of (rat), 227
Pepsin, blood flow and motility and mucosal secretion of (cat), 159
Permeability, mammary duct (goat), 701
Photoreceptor, ion content of, 5*P*
Physostigmine, non-specific sensitizing action of (rabbit), 61*P*
Plantar reflex, oligosynaptic cutaneous reflex (cat), 483
Presynaptic receptors, sympathetic (frog), 237
Post-tetanic potentiation, effect of temperatures (rat), 591
Potassium concentration, muscle fibre types and intracellular (rat), 171
Potassium transport, formation of saliva and (cat), 129
Purkinje shift, extent in mesopic range of (cat), 99

Quinine, effect on excitation-contraction coupling (crab), 641

Receptors, finger tip, 16*P*
Recurrent inhibition, fusimotor neurones (cat), 419
Retinal impedance, light flashes and, 17*P*
Retinotectal projection, newt half-eyes and, 62*P*
Rhesus monkey, effect of low pressure on, 24*P*

Salicylate analogue, antipyretic and metabolic properties of, 81*P*
Saliva, potassium transport and the formation of (cat), 129
Salt absorption, in cloaca (chicken), 753
Salt gland, location of receptors for (goose), 28*P*
Sarcoplasmic reticulum, relation to caveolae in smooth muscle of, 42*P*
Sciatic nerve, *in vivo* superfusion of, 8*P*
Scotopic spatial summation, configuration dependence of, 513
Sex differences, blood pressure responses and, 69
Shortening heat, contraction, relaxation and (frog), 181
Single units, binocular interaction fields of striate (cat), 39
Skin temperature, heat loss regulation and (chicken), 1
Sleep, factors in goat c.s.f. which affect (rats), 565
Smooth muscle, slow changes of potential in (guinea-pig), 403
Sodium transport, intestinal (goldfish), 46*P*
Somatic posterior group, an electrophysiological study, 56*P*
Spatial summation, configuration dependence of, 513
Stretch reflex, dependance on sensation of human, 21*P*
Striate cortex, binocular interaction fields of single units in (cat), 39
Submandibular gland, saliva formation, potassium transport in the isolated (cat), 129
Superior cervical ganglion, synaptic transmission in vagally reinnervated (cat), 87
Sympathetic ganglia, presynaptic acetylcholine receptors in (frog), 237
Synpatic transfer, effect of prolonged depolarization on (squid), 503
Synpatic transmission, vagal reinnervation in superior cervical ganglion and (cat), 87
Synaptic vesicles, effect of stimulation on, 26*P*

Temperature, effect on neuromuscular transmission (rat), 591
heat loss regulation in skin and core (chicken), 1
Temporal adaptation, visual contrast sensitivity and, 531
Tetanic contraction, shortening heat during (frog), 181
Thalamus, somatosensory cells in human, 23*P*
Transmitter release, effect of temperature (rat), 591
Tremor, force and elbow, 29*P*

Vagal reinnervation, synaptic transmission in superior cervical ganglion after (cat), 87

Vagal stimulation, flow of pancreatic juice in response to (cat), 303
Vas deferens, evidence against adrenergic motor transmission in (guinea-pig), 359
Vesicles, role of microtubules in movement of adrenergic (cat), 625
Vinblastine, inhibition of adrenergic vesicle movement in axons (cats), 625

Water absorption, in cloaca (chicken), 753

CONTENTS OF VOLUME 217

No. 1. *August* 1971

PAGE

The responses of chemoreceptors at reduced temperatures. By A. S. PAINTAL 1

Noradrenaline action on nerve terminal in the rat diaphragm. By K. KUBA and T. TOMITA 19

The hyperpolarization of frog skeletal muscle fibres induced by removing potassium from the bathing medium. By T. AKIYAMA and H. GRUNDFEST 33

Impairment of glycine absorption by glucose and galactose in man. By G. C. COOK 61

Rod-dependent intracellular response to light recorded from the pigment epithelium of the cat retina. By RAINER SCHMIDT and ROY H. STEINBERG 71

Incremental responses to light recorded from pigment epithelial cells and horizontal cells of the cat retina. By ROY H. STEINBERG 93

The hypothalamic neurosecretory pathways for the release of oxytocin and vasopressin in the cat. By G. W. BISSET, BARBARA J. CLARK and M. L. ERRINGTON 111

Switching of the respiratory phases and evoked phrenic responses produced by rostral pontine electrical stimulation. By MORTON I. COHEN 133

Responses of inferior collicular neurones of bats to tone bursts with different rise times. By N. SUGA 159

The membrane properties of the smooth muscle of the guinea-pig portal vein in isotonic and hypertonic solutions. By H. KURIYAMA, K. OHSHIMA and Y. SAKAMOTO 179

The parasympathetic secretory nerves of the lacrimal gland of the cat. By M. S. ARENSON and H. WILSON 201

The Florida retinal densitometer. By C. HOOD and W. A. H. RUSHTON 213

Stiles–Crawford effect and the bleaching of cone pigments. By J. R. COBLE and W. A. H. RUSHTON 231

The volume of the T-system and its association with the sarcoplasmic reticulum in slow muscle fibres of the frog. By F. W. FLITNEY 243

No. 2. *September* 1971

PAGE

Vagal non-adrenergic inhibition of guinea-pig stomach. By L. BEANI, CLEMENTINA BIANCHI and A. CREMA 259

Membrane potential of smooth muscle cells in K-free solution. By R. CASTEELS, G. DROOGMANS and H. HENDRICKX . . . 281

Electrogenic sodium pump in smooth muscle cells of the guinea-pig's *taenia coli*. By R. CASTEELS, G. DROOGMANS and H. HENDRICKX 297

Metaboiic rate and thermal insulation in albino and hairless mice. By L. E. MOUNT 315

Adrenal catecholamine secretion during stimulation of the nasal mucous membrane in the rabbit. By D. J. ALLISON and D. A. POWIS 327

Variations in the permeability properties of the inhibitory post-synaptic membrane of the crayfish neuromuscular junction when activated by different concentrations of GABA. By A. TAKEUCHI and NORIKO TAKEUCHI 341

Spontaneous and evoked activity of neurones in the somato-sensory thalamus of the waking cat. By M. A. BAKER . . . 359

Changes in body temperature of the unanaesthetized monkey produced by sodium and calcium ions perfused through the cerebral ventricles. By R. D. MYERS, W. L. VEALE and T. L. YAKSH . . 381

Different types of extrafusal muscle fibres in snake costo-cutaneous muscles. By R. M. A. P. RIDGE 393

Projection from low-threshold muscle afferents of hand and forearm to area 3a of baboon's cortex. By C. G. PHILLIPS, T. P. S. POWELL and M. WIESENDANGER 419

Rhodopsin kinetics in the human eye. By M. ALPERN . . . 447

Sustained and transient neurones in the cat's retina and lateral geniculate nucleus. By B. G. CLELAND, M. W. DUBIN and W. R. LEVICK 473

The effect of type D botulinum toxin on frog neuromuscular junctions. By A. J. HARRIS and R. MILEDI 497

No. 3. *September* 1971

PAGE

Rectification in instantaneous potassium current–voltage relations in *Myxicola* giant axons. By L. Binstock and L. Goldman 517

Cathecholamine synthesis and excretion in rats exposed intermittently to cold. By Cecilia Bibbiani and Maria Pia Viola-Magni 533

Fever produced by prostaglandin E_1. By W. Feldberg and P. N. Saxena 547

Methyl histamines and gastric secretion. By C. F. Code, S. M. Maslinski, F. Mossini and H. Navert 557

Daily changes in amniotic and allantoic fluid during the last three months of pregnancy in conscious, unstressed ewes, with catheters in their foetal fluid sacs. By D. J. Mellor and J. S. Slater . 573

The resting membrane potential of the somatic muscle cells of *Ascaris lumbricoides*. By Alison F. Brading and P. C. Caldwell 605

Human thyroxine-binding globulin and thyroxine-binding prealbumin: dissociation rates. By A. P. Hillier 625

The mechanism of thyroxine transfer from plasma to tissue binding sites. By A. P. Hillier 635

Some properties of a preparation of rat colon perfused *in vitro* through the vascular bed. By D. S. Parsons and G. Powis . 641

The effect of adrenaline and noradrenaline on the blood flow, electrical conductance and external secretion on the pancreas. By T. E. Barlow, J. R. Greenwell, A. A. Harper and T. Scratcherd 665

Storage of ATP and 5-hydroxytryptamine in blood platelets of guinea-pigs. By M. Da Prada, A. Pletscher and J. P. Tranzer 679

Effect of microcirculation changes on brain tissue oxygenation. By H. I. Bicher, D. Bruley, M. H. Knisely and D. D. Reneau 689

The mechanics of sprint running. By Giovanni A. Cavagna, L. Komarek and Stefania Mazzoleni 709

Inhibition of gastric secretion by atropine in conscious rats. By Irene Johansson, L. Lundell and S. E. Svensson . . . 723

Induction of the action potential mechanism in slow muscle fibres of the frog. By R. Miledi, E. Stefani and A. B. Steinbach 737

The form and distribution of the receptive fields of Pacinian corpuscles found in and around the cat's large foot pad. By Bruce Lynn 755

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

22 *May* 1971

DEMONSTRATIONS

SUBJECT INDEX

4-acetamidophenol, temperature response to intracerebral prostaglandin E_1, adrenaline and pyrogen and effect of (rat), 33*P*
Actinomycin D, inhibition of denervation changes in mammalian skeletal muscle by, 47*P*
Action potential mechanism, induction in slow muscle fibres of (frog), 737
Adrenal medulla, effect of stimulation of nasal mucous membrane on catecholamine secretion from (rabbit), 327
Adrenaline, effect on blood flow, conductance and external secretion in pancreas of (cat), 665
Afferents, projection to cortex from hand and forearm from muscle (baboon), 419
Allantoic fluid, changes during pregnancy in (ewe), 573
γ-amino butyric acid, effect on permeability of inhibitory membrane of neuromuscular junction (crayfish), 341
Amniotic fluid, changes during pregnancy in (ewe), 573
Angiotensin II, drinking induced by injection into hypothalamus of (rhesus monkey), 59*P*
Aortovelography, direction-resolving Doppler instrument for transcutaneous, 5*P*
ATP, storage in blood platelets of 5-hydroxytryptamine and (guinea-pig), 679
Atropine, inhibition of gastric secretion, (rat), 723

Baroreceptor activity, effect of vascular lesions and hypertension on aortic arch (rabbit), 30*P*
Blood platelets, storage of ATP and 5-hydroxytryptamine in (guinea-pig), 679
Body temperature, changes produced by sodium and calcium perfusion of cerebral ventricles (monkey), 381
Botulinum toxin type D, effect on neuromuscular junctions (frog), 497
Brain tissue, effect of microcirculation changes on (cat), 689

Caffeine, action on myocardial contractility (frog), 64*P*
Calcium, exchange in vascular smooth muscle of, 49*P*
method for altering intracellular concentration of, 20*P*
perfusion through cerebral ventricles and effect on body temperature (monkey), 381
Carbachol, smooth muscle depolarization by, 38*P*
Catecholamine, effect of stimulation of nasal mucous membrane on adrenal secretion of (rabbit), 327
Catecholamine synthesis, effect of cold on (rat), 533
Cerebral ventricles, effect on body temperature of sodium and calcium perfusion of (monkey), 381
Chemoreceptors, responses at reduced temperatures of (cat), 1
Clonidine, neurones containing 5-hydroxytryptamine and sleep elicited by, 51*P*
Cold, effect on catecholamine synthesis and excretion of (rat), 533
Colon, effect of perfusion through vascular bed on isolated (rat), 641
Cone pigments, Stiles–Crawford effect and bleaching of, 231
Contrast threshold, electrophysiological measure of psychophysical, 54*P*
Cortex, mass and unitary activity in primary somatosensory area (cats), 45*P*
projection from muscle afferents of hand and forearm to (baboon), 419
Corticosteroid rhythms, effect of simulated time zone shifts on, 50*P*
Costocutaneous muscle, extrafusal muscle fibres in (snake), 393
Current–voltage relations, rectification in instantaneous potassium (*Myxicola*), 517
Cutaneous afferent units, cortical projection of, 46*P*

Denervation hypersensitivity, prevention of, 67*P*

Elbow tremor, effect of load on, 36*P*
Electrogenic sodium pump, in smooth muscle cells of *taenia coli* (guinea-pig), 297
Eye, rhodopsin kinetics in, 447

Excretion, effect of cold on (rat), 533

Fever, produced by prostaglandin E_1 (cat, rabbit and rat), 547
Foetal hearts, substrate requirements of (mouse), 56*P*
Foot pad, receptive fields of Pacinian corpuscles of (cat), 755

Galactose, impairment of glycine absorption by glucose and, 61
Gastric secretion, inhibition by atropine of (rat), 723
methyl histamines and (dog and cat), 557
Glucose, impairment of glycine absorption by galactose and, 61
Glycine, impairment by glucose and galactose of absorption of, 61
Gratings, appearance with and without fundamental Fourier component, 17*P*

Histamines, gastric secretion and methyl derivatives of (dog and cat), 557
Horizontal cells, incremental responses to light in (cat), 93
Host immunity, metabolic changes associated with development of (*Nippostrongylus brasiliensis*), 57*P*
5-hydroxytryptamine, storage in blood platelets of ATP and (guinea-pig), 679
Hyperpolarization, in skeletal muscle fibres on removal of potassium (frog), 33
Hypothalamus, neurosecretory pathways for release of oxytocin and vasopressin in (cat), 111

Inferior colliculus, responses to tone bursts of neurones of (bat), 159
Inhibition, vagal stimulation of stomach and non-adrenergic (guinea-pig), 259
Inhibitory post-synaptic membrane, effect of GABA on permeability of inhibitory membrane at neuromuscular junction (crayfish), 341
Invertebrate muscle cells, resting membrane potential of (*Ascaris lumbricoides*), 605

Lacrimal gland, parasympathetic secretory nerves of (cat), 201
Lateral geniculate nucleus, sustained and transient neurones in (cat), 473
Liver, mechanism of thyroxine transfer from plasma to tissue binding sites in (rat), 635
Luteinizing hormone, arterial and ovarian venous plasma concentrations of (rat), 34*P*

Mechanics, of sprint running, 709
Membrane potential, in smooth muscle cells of *taenia coli* in K-free solution (guinea-pig), 281
in somatic muscle cells (*Ascaris lumbricoides*), 605
Membrane properties, of smooth muscle of portal vein (guinea-pig), 179
Metabolic rate, and thermal insulation in albino and hairless mammals (mice), 315
Methyl histamines, effect on gastric secretion of (dog and cat), 557
Microcirculation, effect on brain tissue oxygenation of changes in (cat), 689
Microscope cold stage, stage refrigerator or, 1*P*
Monocytes, effect of monocyte mitogenic plasma from another animal on cultured (sheep), 58*P*
Motor units, discharge rate in muscle during maximal effort of isolated single, 12*P*
Muscle fibres, hyperpolarization induced by removal of potassium (frog), 33
in costocutaneous muscle (snake), 393

Nasal mucous membrane, adrenal catecholamine secretion during stimulation of (rabbit), 327
Nerve conduction, in normal and demyelinated mammalian nerve fibres, 66*P*
Nerve terminal, noradrenaline action on (rat), 19
Neurone, amplifier for recording from single, 21*P*
Neurones, activity on waking of ventrobasal thalamic (cat), 359
responses to tone bursts of inferior collicular (bat), 159
Neuromuscular junction, effect of GABA on permeability of inhibitory post-synaptic membrane of (crayfish), 341
effect of type D botulinum toxin on (frog), 497
Noradrenaline, action on nerve terminal in diaphragm (rat), 19
effect on blood flow, conductance and external secretion in pancreas of (cat), 665
excitatory action of myometrium of acetylcholine compared with (guinea-pig), 39*P*
increase at nerve terminals of vesicular, 27*P*

Oxidative recovery heat, ratio in sartorius between initial heat and (toad), 63*P*

Oxygenation, effect of microcirculation changes on brain tissue (cat), 689
Oxytocin, hypothalamic neurosecretory pathways for release of (cat), 111

Pacinian corpuscles, in foot pad and receptive fields of (cat), 755
Pancreas, effects of adrenaline and noradrenaline on (cat), 665
Pentobarbitone, depression of cortical EPSPs by, 41*P*
Permeability, of inhibitory post-synaptic membrane at neuromuscular junction when activated by GABA (crayfish), 341
Phrenic discharge, effect of rostral pontine electrical stimulation on respiratory phases and (cat), 133
Pigment epithelium, incremental responses to light in cells of (cat), 93
rod-dependent intracellular response to light in (cat), 71
Portal vein, membrane properties of smooth muscle of portal vein (guinea-pig), 179
Post-pituitary hormones, release of neurophysin, oxytocin and arginine vasopressin (rat), 23*P*
Potassium, hyperpolarization in skeletal muscle fibres induced by removal of (frog), 33
rectification in instantaneous current–voltage relations of (*Myxicola*), 517
Pregnancy, changes in amniotic and allantoic fluid during (ewe), 573
Prostaglandin E_1, fever produced by (cat, rabbit and rat), 547
Prostaglandins, action on sphincter pupillae (cow), 25*P*
Pulmonary compliance, measurement without oesophageal tube of, 10*P*

Receptive fields, Pacinian corpuscles of foot pad and form and distribution of (cat), 755
Respiratory phases, effect of rostral pontine electrical stimulation on (cat), 133
Resting potential, in somatic muscle cell membrane (*Ascaris lumbricoides*), 605
Retina, incremental responses to light in pigment epithelial and horizontal cells of (cat), 93
rod-dependent intracellular response to light in pigment epithelium of (cat), 71
sustained and transient neurones in (cat), 473
Retinal densitometer, Florida, 213
Retinal ganglion cell, size of receptive field of, 52*P*
Retinal images, stabilized, 9*P*
Retinotectal projection, regeneration of optic nerve and recovery of (fish), 53*P*
Rhodopsin, kinetics in the eye, 447
Rod excitation, dependence of pigment epithelial response to light on (cat), 71
Rostrolateral pons, effect on respiratory phases of electrical stimulation of (cat), 133

Sarcoplasmic reticulum, volume of T-system in slow muscle fibres and (frog), 243
Secretory nerves, of lacrimal glands (cat), 201
Seminal vesicles, ultrastructural differentiation of fibre types in (rabbit), 7*P*
Seminiferous tubules, penetration of rubidium, sucrose and inulin into (rat), 15*P*
Sleep, activity of ventrobasal thalamic neurones (cat), 359
Slow muscle fibres, induction of action potential mechanism in (frog), 737
volume of T-system and sarcoplasmic reticulum in (frog), 243
Slow-twitch muscle, post-tetanic depression of isometric twitch responses in (cat), 62*P*
Smooth muscle, membrane properties of portal vein (guinea-pig), 179
membrane staining by uranyl cation in, 3*P*
taenia coli membrane potential in K-free solution (guinea-pig), 281
Smooth muscle cells, electrogenic sodium pump in *taenia coli* (guinea-pig), 297
Sodium, perfusion through cerebral ventricles and effect on body temperature (monkey), 381
Sodium pump, effects in low potassium red cells of an antibody and potassium on (goat), 61*P*
presence in *taenia coli* smooth muscle cells of electrogenic (guinea-pig), 297
Sound, response of inferior collicular neurones to tone bursts with different rise times (bat), 159
Sprint running, mechanics of, 709
Stiles–Crawford effect, bleaching of cone pigments and, 231
Stomach, vagal stimulation and non-adrenergic inhibition of (guinea-pig), 259
Sweating threshold, influence of exercise on, 37*P*

Taenia coli, electrogenic sodium pump in smooth muscle cells of (guinea-pig), 297
membrane potential in smooth muscle cells of (guinea-pig), 281
Temperature, responses of chemoreceptors at reduced (cat), 1
responses of ear arteries to (L-noradrenaline, D-adrenaline, histamine and metaraminol and (rabbit), 31*P*
use of cooper constantan thermocouples to give digital display of, 2*P*
Thalamus, activity on waking of neurones in somatosensory (cat), 359
Thermal insulation, and metabolic rate in albino and hairless mammals (mice), 315
Thyroxine-binding globulin, rate of dissociation of thyroxine from, 625
Thyroxine-binding pre-albumin, rate of dissociation of thyroxine from, 625
Thyroxine transfer, mechanism of (rat), 635
T-system, sarcoplasmic reticulum in slow muscle fibres and volume of (frog), 243

Uterine glands, delayed implantation and ultrastructural changes in (Roe deer), 13*P*

Vagal inhibition, of stomach (guinea-pig), 259
Vascular resistance, effect of local temperature on (dog), 29*P*
Vasopressin, hypothalamic neurosecretory pathways for release of (cat), 111
irreversible haemorrhagic shock and, 43*P*
Vinblastine, effect on adrenergic nerve of, 26*P*
Visual processes, computer modelling of, 18*P*

CONTENTS OF VOLUME 218

No. 1 *October* 1971

PAGE

The responses of frog muscle spindles and fast and slow muscle fibres to a variety of mechanical inputs. By M. C. BROWN . . 1

Noradrenaline and acetylcholine responses of supraoptic neurosecretory cells. By J. L. BARKER, J. W. CRAYTON and R. A. NICOLL 19

Aberrant visual projections in the Siamese cat. By D. H. HUBEL and T. N. WIESEL 33

Effect of electrical stimulation on the fluorescence intensity of catecholamine-containing tuberal nerve cells. By W. LICHTENSTEIGER 63

An analysis of acetylcholine responses of junctional and extrajunctional receptors of frog muscle fibres. By ANNE FELTZ and ALBERTO MALLART. With an Appendix by R. KAHN and A. LE YAOUANC 85

Ionic permeability changes induced by some cholinergic agonists on normal and denervated frog muscles. By ANNE FELTZ and ALBERTO MALLART 101

The effect of calcium on the force-velocity relation of briefly glycerinated frog muscle fibres. By F. J. JULIAN 117

Experimental alteration of the relationship between the external calcium concentration and the contractile force generated by auricular trabeculae isolated from the heart of the frog, *Rana pipiens*. By R. A. CHAPMAN 147

Chemical change and energy output during muscular contraction. By CLAUDE GILBERT, K. M. KRETZSCHMAR, D. R. WILKIE and R. C. WOLEDGE 163

Changes of sodium and urea concentrations in the renal papillary interstitial fluid on dehydration of rats. By J. LEE and P. G. WILLIAMS 195

Analysis of the potential-dependent changes in optical retardation in the squid giant axon. By L. B. COHEN, B. HILLE, R. D. KEYNES, D. LANDOWNE and E. ROJAS 205

PAGE

Nucleotide requirements for sodium-sodium exchange catalysed by the sodium pump in human red cells. By I. M. GLYNN and J. F. HOFFMAN 239

No. 2 *October* 1971

Ionic effects on spindle adaptation. By I. HUSMARK and D. OTTOSON 257

Participation of the anterior hypothalamus in the baroreceptor reflex. By S. M. HILTON and K. M. SPYER 271

Enhancement of the post-occlusive oscillation in the splenic circulation by adenosine. By KOROKU HASHIMOTO and SUSUMU SATOH 295

The effect of different ionic levels on the electrical response of toad skin to noradrenaline. By C. R. HOUSE 305

Effects on body temperature of prostaglandins of the A, E and F series on injection into the third ventricle of unanaesthetized cats and rabbits. By A. S. MILTON and SABINE WENDLANDT . . 325

The permeation of several materials into the fluids of the rabbit's brain. By HUGH DAVSON and KEASLEY WELCH 337

Distribution of magnesium in the arterial wall. By VLADIMÍR PALATÝ 353

Inhibition by prostaglandin E_1 of gastric secretion in the dog. By JAMES E. NEZAMIS, ANDRÉ ROBERT and DAVID F. STOWE . 369

Angiotensin II-like activity in circulating arterial blood in immature and adult rabbits. By FIONA BROUGHTON PIPKIN, JOAN C. MOTT and N. R. C. ROBERTON 385

Muscle spindle response at the onset of isometric voluntary contractions in man. Time difference between fusimotor and skeletomotor effects. By A. B. VALLBO 405

Selective effects of an octopus toxin on action potentials. By ANGELA DULHUNTY and PETER W. GAGE 433

Reflex effects on the heart of stimulating left atrial receptors. By C. M. FURNIVAL, R. J. LINDEN and H. M. SNOW 447

Depression of the reflex tachycardia from the left atrial receptors by acidaemia. By J. D. HARRY, C. T. KAPPAGODA, R. J. LINDEN and H. M. SNOW 465

PAGE

A new approach for determining the volume of cerebral extracellular fluid and demonstration of its communication with c.s.f. By REINHARD L. FRIEDE and KUO HAO HU 477

Neuronal pathway of the recurrent facilitation of motoneurones. By H. HULTBORN, ELŻBIETA JANKOWSKA, S. LINDSTRÖM and W. ROBERTS 495

No. 3 *November* 1971

Depolarization of the tooth pulp afferent terminals in the brain stem of the cat. By W. I. R. DAVIES, D. SCOTT JR., K. VESTERSTRØM and L. VYKLICKÝ 515

Sodium and rubidium fluxes in rat red blood cells. By L. A. BEAUGÉ and OLGA ORTÍZ 533

Nucleus Z, the medullary relay in the projection path to the cerebral cortex of group 1 muscle afferents from the cat's hind limb. By S. LANDGREN and H. SILFVENIUS 551

The effects of temperature and ions on the current–voltage relation and electrical characteristics of a molluscan neurone. By MICHAEL F. MARMOR 573

The independence of electrogenic sodium transport and membrane potential in a molluscan neurone. By MICHAEL F. MARMOR . 599

Thermoregulation around a new 'set-point' established in the monkey by altering the ratio of sodium to calcium ions within the hypothalamus. By R. D. MYERS and T. L. YAKSH 609

Maternal hyperventilation and foetal hypocapnia in sheep. By P. BAILLIE, G. S. DAWES, CLAUDIE L. MERLET and R. RICHARDS 635

The action of carbon dioxide on afferent transmission in the dorsal column-lemniscal system. By MARY E. MORRIS 651

The action of carbon dioxide on synaptic transmission in the cuneate nucleus. By MARY E. MORRIS 671

Effect of Na, metabolic inhibitors and ATP on Ca movements in L cells. By J. F. LAMB and R. LINDSAY 691

Depolarization and calcium entry in squid giant axons. By P. F. BAKER, A. L. HODGKIN and E. B. RIDGWAY 709

The binomial nature of transmitter release at the crayfish neuromuscular junction. By E. W. JOHNSON and A. WERNIG . . . 757

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

SUBJECT INDEX

Acetylcholine, responses of junctional and extrajunctional receptors of muscle fibres to (frog), 85
responses of supraoptic neurosecretory cells and (cat), 19
Acetylcholinesterase, electrophysiological estimation of inhibition of, 66*P*
Acidaemia, depression of reflex tachycardia from left atrial receptors by (dog), 465
Action potentials, effects in muscle fibres of octopus toxin on (toad), 433
Adenosine, enhancement of post-occlusive oscillation in splenic circulation by (dog), 295
Adrenal medulla, formation and release of secretory material in (golden hamster), 15*P*
Afferent transmission, action in dorsal column-lemniscal system of carbon dioxide on (cat), 651
[^{3}H]-γ-aminobutyric acid, accumulation and efflux in isolated sympathetic ganglia of, 32*P*
Anaesthetic alcohols, effect in erythrocytes on carrier mediated transport of, 50*P*
Angiotensin, effect of selective medullary coagulation on cardiovascular response to (rabbit), 70*P*
Angiotensin-induced drinking, inhibition by isotonic saline or water ingestion of, 45*P*
Angiotensin II-like activity, arterial blood in new-born animals and (sheep), 61*P*
circulating arterial blood in immature animals and adults and (rabbit) 385
Anterior hypothalamus, baroreceptor reflex and (cat), 271
Arterial wall, distribution of magnesium in (rat), 353
Ataxia-meter, mechanical, 27*P*
Atrial receptors, depression by acidaemia of reflex tachycardia from left (dog), 465
reflex effects on the heart of stimulating left (dog), 447
ATP, effect on Ca movements in L cells of Na metabolic inhibitors and, 691
Auditory conditioning, frequency-modulated tones and temporal specificity in, 104*P*
Auerbach's plexus, inhibitory innervation of gut and fluorescence histochemistry of, 77*P*
subcellular localization of acetylcholine in, 92*P*
Auricular trabeculae, alteration of relationship between external calcium concentration and contractile force in (frog), 147
Axon, depolarization and calcium entry in (squid), 709

Baroreceptor reflex, participation of anterior hypothalamus in (cat), 271
Blood–brain barrier, perfusion of subarachnoid space and transport of K at, 8*P*
permeation of several materials across (rabbit), 337
Blood pressure, indirect method for measurement of (rat), 1*P*
Body temperature, effects of injection of prostaglandins into third ventricle on (cats and rabbits), 325
Brain, permeation of several materials into fluids of (rabbit), 337
Brain stem, depolarization of tooth pulp afferent terminals in (cat), 515

Calcium, alteration of relationship between contractile force in auricular trabeculae and external (frog), 147
effect on force–velocity relation of muscle fibres of (frog), 117
effect on thermoregulation of altering ratio in hypothalamus of sodium to (monkey), 609
Calcium entry, depolarization in giant axons and (squid), 709
Calcium transfer, effect in L cells of Na metabolic inhibitors and ATP, 691
Carotid artery, controlled heat damage and responses of (sheep), 18*P*
Carbon dioxide, action on afferent transmission in dorsal column-lemniscal system of (cat), 651
action on synaptic transmission in cuneate nucleus of (cat), 671
Catecholamine, effect of electrical stimulation on fluorescence of tuberal nerve cells containing (rat), 63
Catecholaminergic mechanisms, drinking induced by angiotensin and, 43*P*

XUM

Cerebral cortex, the medullary relay of Group I hind limb muscle afferents to (cat), 551
Cerebral extracellular fluid, determination of volume of (bowfin), 477
Cerebellum, dual input via mossy and climbing fibres to (cat), 90*P*
Cerebrospinal fluid, communication of cerebral extracellular fluid with (bowfin), 477
permeation of several materials into brain and (rabbit), 337
Cervical ganglion, preganglionic origin of afferent fibres to small granule-containing cells of superior (rat), 95*P*
Chemical change, energy output during muscular contraction and (frog), 163
Chemoreceptor discharge, respiratory fluctuation of arterial pH and (cat), 73*P*
Chloride permeability, estimate in erythrocytes of non-exchange-restricted, 49*P*
Cholinergic agonists, changes in ionic permeability of normal and denervated muscle induced by (frog), 101
Chorda tympani, foetal responses to taste stimuli (sheep), 104*P*
Contractile force, alteration of relationship between external calcium concentration and generation in auricular trabeculae of (frog), 147
Corticosteroids, ultramicro protein binding method for assay of, 28*P*
Cuneate nucleus, action of carbon dioxide on synaptic transmission in (cat), 671
Current–voltage relation, effects in neurone of temperature and ions on (*Anisodoris nobilis*), 573

Dehydration, sodium and urea concentrations in renal papillary fluid on (rat), 195
Dental pulp, termination sites of first order nerve fibres from, 72*P*
Depolarization, calcium entry in giant axons and (squid), 709
tooth pulp afferent terminal (cat), 515
Dorsal column-lemniscal system, action of carbon dioxide on afferent transmission in (cat), 651
Drinking, stimulation of lateral hypothalamus and refractory period of neurones involved in, 46*P*

Electrogenic sodium pump, acetylcholine response in ileum longitudinal muscle and (guinea-pig), 58*P*
Electrogenic sodium transport, independence in neurone of membrane potential and (*Anisodoris nobilis*), 599
Energy output, chemical change during muscular contraction and (frog), 163
Erythrocytes, nucleotide requirements for sodium-sodium exchange in, 239
sodium and rubidium fluxes in (rat), 533
Erythrolabe, optical density of, 100*P*
Exercise capacity, body muscle in competition cyclists and above-average, 63*P*
Extrafusal muscle, tension changes in small amplitude sinusoidal stretching in, 20*P*
Extrajunctional receptors, acetylcholine responses of muscle fibre (frog), 85

Fast muscle fibres, responses to mechanical inputs of (frog), 1
Flexor reflex, cardiovascular involvement in (dog), 83*P*
Fluorescence, effect of electrical stimulation of tuberal nerve cells on catecholamine (rat), 63
Foetal hypocapnia, maternal hyperventilation and (sheep), 635
Force–velocity relation, effect of calcium on muscle fibre (frog), 117
Forelimbs, primary afferent depolarization in cuneate nucleus evoked by stimulation of (rat), 87*P*
Fusimotor effects, isometric voluntary contractions and time relation between skeletomotor and, 405

Gastric secretion, inhibition by prostaglandin of (dog), 369
Glycylglycine, site for intestinal hydrolysis of, 39*P*
Group I afferents, the medullary relay to cerebral cortex from hind limb (cat), 551

Heart, reflex effects of stimulation of left atrial receptors on (dog), 447
Hexose carriers, small intestine, 38*P*
Hyperventilation, foetal hypocapnia and maternal (sheep), 635
Hypocapnia, maternal hyperventilation and foetal (sheep), 635
Hypothalamus, effect on thermoregulation of altering ratio of sodium to calcium in (Monkey), 609

Immature animals, angiotensin II-like activity in blood of (rabbit), 385

Insect, axon pathways of excitable nerve cell bodies in central nervous system of, 55*P*
Intraocular tension, studies on (rabbit), 10*P*
Ionic concentrations, electrical response of skin to noradrenaline at different (toad), 305
Isometric voluntary contractions, muscle spindle response at onset of, 405

Junctional receptors, acetylcholine responses of muscle fibre (frog), 85

L cell, effect of Na, metabolic inhibitors and ATP on Ca movements in, 691
Leucocytes, adhesiveness to blood vessel walls of circulating, 91*P*
L-leucine carrier, erythrocyte membrane, 52*P*

Maculotoxin, MTX, effects on action potentials of (toad), 433
Magnesium, distribution in arterial wall of (rat), 353
Mechanical inputs, responses of muscle spindles and fast and slow muscle fibres to (frog), 1
Medullary relay, projection to cerebral cortex of Group I hind limb muscle afferents and (cat), 551
Membrane potential, independence in neurone of electrogenic sodium transport and (*An isodoris nobilis*), 599
Membrane vesiculation, exocytosis in neurohypophysis, adenohypophysis and adrenal medulla and, 94*P*
Mesenteric capillaries, measurement of filtration coefficient of (frog), 25*P*
measurement of filtration coefficient of (frog), 26*P*
Motoneurones, neuronal pathway of recurrent facilitation of (cat), 495
Muscle fibres, active and passive shortening in voltage-clamped (frog), 13*P*
effect of calcium on force–velocity relation of briefly glycerinated (frog), 117
ionic permeability changes induced by cholinergic agonists in normal and denervated (frog), 101
Muscle spindle, ionic effects on adaptation of (frog), 257
response at onset of isometric voluntary contractions of, 405
Muscle spindle endings, fusimotor stimulation and sensitivity to sinusoidal stretching of, 56*P*
Muscle spindles, responses to mechanical inputs of (frog), 1
ultrastructure of (snake), 17*P*
Muscular contraction, chemical change and energy output during (frog), 133

Neuroglial cells, metabolic responses to perfusion of cerebral ventricles of (rat), 88*P*
Neuromime, simple high speed, 3*P*
Neuromuscular junction, binomial nature of transmitter release at (crayfish), 757
Noradrenaline, effect of different ionic levels on electrical response of skin to (toad), 305
responses of supraoptic neurosecretory cells and (cat), 19
Nucleotides, sodium exchange catalysed by sodium pump in red cells and, 239
Nucleus pontis, visual input to neurones in, 79*P*

Octopus toxin, effects on action potentials of (toad), 433
Oestrous cycle, plasma LH levels and changes in protein synthesis during, 21*P*
Optical retardation, analysis of potential-dependent changes in giant axon in (squid), 205

Permeability, effects on normal and denervated muscle of cholinergic agonists on ionic (frog), 101
Post-occlusive oscillation, enhancement by adenosine in splenic circulation (dog), 295
Potassium concentration, effects on spindle adaptation of (frog), 257
Preoptic area, sexual difference in forebrain (rat), 22*P*
Propriospinal pathways, lumbosacral and cervical segments and (cat), 76*P*
Prostaglandin E_1, inhibition of gastric secretion by (dog), 369
Prostaglandins, effects on body temperature on injection into third ventricle of (cats and rabbits), 325

Raster production, device producing multiple scans for use in, 6*P*
Recurrent facilitation, neuronal pathway of motoneurone (cat), 495
Renal function, sleep and, 40*P*
Renal growth, inhibition by substances from kidney of compensatory (rat), 62*P*

Renal papillary fluid, dehydration and changes of sodium and urea concentrations in (rat), 195
Renin-angiotensin system, activity in immature animals and adults of (rabbit), 385
Respiratory neurones, descending pathways from lateral (cat), 82*P*
Retina, structure of intercellular junction in developing (*Xenopus laevis*), 97*P*
Rods, rapid dark adaptation of, 101*P*
Rubidium fluxes, red blood cell (rat), 533

Serial luteinizing hormone, measurements of (rat), 29*P*
Sexual differentiation, brain of neonatal animal and (rat), 22*P*
Skeletal muscle, effect of Ca^{2+} on acetylcholine sensitivity of denervated, 34*P*
Skeletomotor activity, isometric voluntary contractions and time relation between fusimotor and, 405
Skin, effect of different ionic levels on electrical response to noradrenaline of (toad), 305
sodium uptake by outside surface of, (frog), 33*P*
Slow muscle fibres, responses to mechanical inputs of (frog), 1
Smooth muscle, counter-cation interaction at membrane of taenia coli (guinea-pig), 36*P*
freeze-etch observations on membrane structure in taenia coli (guinea-pig), 11*P*
Sodium, dehydration and changes in renal papillary fluid concentration of (rat), 195
effect on Ca movements in L cells of metabolic inhibitors, ATP and, 691
effect on thermoregulation of altering ratio in hypothalamus of calcium to (monkey), 609
Sodium concentration, effects on spindle adaptation of (frog), 257
Sodium fluxes, red blood cell (rat), 533
Sodium pump, nucleotide requirements in red cells for sodium exchange catalysed by, 239
Sodium-sodium exchange, nucleotide requirements in red cells for, 239
Sodium transport, independence in neurone of membrane potential and electrogenic (*Anisodoris nobilis*), 599
Splenic circulation, enhancement by adenosine of post-occlusive oscillation in (dog), 295
Stilboestrol, effect on responses of uterine or ovarian vessels to catecholamine and acetylcholine of (rabbit), 64*P*
Stimulator, digital, 5*P*
Stimulator, production of trains of pulses repetitively by, 7*P*
Striate neurones, stimulus specificities of discharge centre in receptive field of simple (cat), 53*P*
Striated muscle, mechanical properties of cross-bridges of (frog), 59*P*
Subarachnoid space, transfer of amino acids and urea to and from, 42*P*
Substantia nigra, inhibition following stimulation of caudate nucleus, in, 84*P*
Supraoptic nucleus, noradrenaline and acetylcholine responses of neurosecretory cells in the (cat), 19
Sympathetic nerve terminals, life cycle of vesicles in, 67*P*
Synaptic transmission, action in cuneate nucleus of carbon dioxide on (cat), 671

Tachycardia, depression by acidaemia of left atrial receptor reflex (dog), 465
Taenia coli, Na participation in recovery from K-contracture in (guinea-pig), 48*P*
Temperature, effects on current–voltage relation and electrical characteristics of neurone of (*Anisodoris nobilis*), 573
mechanical strength of femur and environmental (rat), 74*P*
Tetanus toxin, presynaptic effect at neuromuscular junction of, 68*P*
Thalamic reticular units, mediation of effects of strong peripheral stimulation on, 81*P*
Thermoregulation, effect of altering ratio of sodium to calcium in hypothalamus on (monkey), 609
Tooth pulp, depolarization in brain stem of afferent terminals of (cat), 515
Transmitter release, binomial nature of neuromuscular junction (crayfish), 757
Transretinal potential, effects of light and drugs on d.c. (frog), 103*P*
Tube breathing, simulation without tube of respiratory stimulating effect of, 71*P*
Tuberal nerve cells, effect of electrical stimulation on catecholamine fluorescence of (rat), 63
Tubero-infundibular system, identification of neurones of, 86*P*

Urea, dehydration and changes in renal papillary fluid concentration of (rat), 195
Urine, osmolarity in foetal and post-natal (pig), 30*P*

Vestibular nuclei, projection to cerebral cortex from superior and medial (cat), 79*P*
Visual cortex, lack of specificity in young of neurones in (cat), 98*P*
Visual projections, aberrant (Siamese cat), 33
Voltage-dependence, optical retardation responses in giant axons and (squid), 205

CONTENTS OF VOLUME 219

No. 1 *November* 1971

PAGE

On the direct and crossed components of reflex responses to unilateral stimulation of the carotid body chemoreceptors in the dog. By D. S. McQueen and A. Ungar 1

Effects of calcium and magnesium on the frequency of miniature end-plate potentials during prolonged tetanization. By W. P. Hurlbut, H. B. Longenecker Jr. and Alexander Mauro . 17

The effect of metal ions and antidiuretic hormone on oxygen consumption in toad bladder. By A. W. Cuthbert and P. Y. D. Wong 39

The origin of the basal cell potential in frog corneal epithelium. By Norio Akaike. 57

Responses of vibration-sensitive receptors in the interosseous region of the duck's hind limb. By Patricia K. Dorward and A. K. McIntrye 77

Myoepithelial cell activation in the submaxillary salivary gland. By A. C. Darke and L. H. Smaje 89

Effects of descending impulses on transmission through the spinocervical tract. By A. G. Brown 103

Intracellular potentials in bull spermatozoa. By Charles Lindemann and Robert Rikmenspoel 127

Changes in the physiology and fine structure of the taenia of the guinea-pig caecum following transplantation into the anterior eye chamber. By G. Burnstock, B. J. Gannon, T. Malmfors and D. C. Rogers 139

Development of isometric tension in simian extraocular muscle. By A. F. Fuchs and E. S. Luschei 155

Excitation–contraction coupling in frog ventricle: evidence from voltage clamp studies. By M. Morad and R. K. Orkand . . 167

Frequency–response analysis of central vestibular unit activity resulting from rotational stimulation of the semicircular canals. By G. Melvill Jones and J. H. Milsum 191

PAGE

Na and Ca components of action potentials in amphioxus muscle cells. By S. HAGIWARA and Y. KIDOKORO 217

Excitation–contraction coupling in amphioxus muscle cells. By S. HAGIWARA, MARYANNA P. HENKART and Y. KIDOKORO . . 233

No. 2 *December* 1971

Ultrastructure and contractures of the pigeon iris striated muscle. By G. PILAR and P. C. VAUGHAN 253

Central neural regulation by adrenergic nerves of the daily rhythm in hepatic tyrosine transaminase activity. By IRA B. BLACK and DONALD J. REIS 267

The mechanical properties and heat production of chicken latissimus dorsi muscles during tetanic contractions. By S. P. CANFIELD 281

Permeability of lung capillaries and alveoli to non-electrolytes in the foetal lamb. By I. C. S. NORMAND, R. E. OLIVER, E. O. R. REYNOLDS and L. B. STRANG. With an Appendix by KEASLEY WELCH 303

The effect of intravenous infusion of antidiuretic hormone on water intake in the rat. By BARBARA J. ROLLS 331

Kininogenase of the guinea-pig's coagulating gland and the release of bradykinin. By C. MORIWAKI and M. SCHACHTER . 341

The detection of gratings in narrow-band visual noise. By BARBARA E. CARTER and G. BRUCE HENNING 355

Chloride conductance in normal and myotonic muscle fibres and the action of monocarboxylic aromatic acids. By S. H. BRYANT and A. MORALES-AGUILERA 367

Stimulation of tubero-infundibular dopamine neurones and gonadotrophin secretion. By P. J. KELLER and W. LICHTENSTEIGER 385

Release of an antidiuretic substance by bradykinin in the rat. By M. C. HARRIS. 403

A study of the inferior mesenteric and pelvic ganglia of guinea-pigs with intracellular electrodes. By P. J. CROWCROFT and J. H. SZURSZEWSKI 421

Excitatory input from the distal colon to the inferior mesenteric ganglion in the guinea-pig. By P. J. CROWCROFT, MOLLIE E. HOLMAN and J. H. SZURSZEWSKI 443

PAGE

The secretory nerves of the parotid gland of the dog. By JAN HOLMBERG 463

Afferent discharges from arterial mechanoreceptors in the kidney of the rabbit. By ARIKA NIIJIMA 477

Sodium transport by perfused giant axons of *Loligo*. By P. F. BAKER, RACHEL F. FOSTER, D. S. GILBERT and T. I. SHAW . . 487

No. 3 *December* 1971

Mechanism of compensatory renal hypertrophy. By S. E. DICKER and D. G. SHIRLEY 507

Lymph flow and changes in intracellular enzymes during healing and rejection of rabbit skin grafts. By M. K. JASANI and G. P. LEWIS 525

Splanchnic nerve inhibition of gastric acid secretion and mucosal blood flow in anaesthetized cats. By J. D. REED and D. J. SANDERS 555

Mechanisms relating gastric acid secretion and mucosal blood flow during gastrin and histamine stimulation. By J. D. REED and J. R. SMY 571

The locations and activities of medullary neurones associated with ruminant forestomach motility. By R. HARDING and B. F. LEEK . 587

The independence of the temporal integration properties of individual chromatic mechanisms in the human eye. By J. KRAUSKOPF and J. D. MOLLON 611

Responses to visual contours: spatio-temporal aspects of excitation in the receptive fields of simple striate neurones. By P. O. BISHOP, J. S. COOMBS and G. H. HENRY 625

Interaction effects of visual contours on the discharge frequency of simple striate neurones. By P. O. BISHOP, J. S. COOMBS and G. H. HENRY 659

Amino acids and presynaptic inhibition in the rat cuneate nucleus. By N. DAVIDSON and C. A. P. SOUTHWICK 689

Observations on the control of stepping and hopping movements in man. By G. MELVILL JONES and D. G. D. WATT 709

Muscular control of landing from unexpected falls in man. By G. MELVILL JONES and D. G. D. WATT 729

PAGE

Further studies on prostaglandin E_1 fever in cats. By W. Feldberg and P. N. Saxena 739

The fine structural localization of cholinesterases in the carotid body of the cat. By Kathleen J. Ballard and J. V. Jones . 747

Further evidence for the involvement of microtubules in the intra-axonal movement of noradrenaline storage granules. By P. Banks, D. Mayor and D. R. Tomlinson 755

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

24–25 September 1971

SUBJECT INDEX

Acidosis, detection of foetal, 15*P*
Adrenergic vesicles, role of microtubules in movement of (cat), 755
Alveoli, non-electrolyte permeability in foetal lung capillaries and (sheep), 303
Amino acids, presynaptic inhibition in cuneate nucleus and (rat), 689
Anterior eye chamber, changes following transplantation of taenia of the caecum into (guinea-pig), 139
Antidiuretic hormone, effect on oxygen consumption in bladder of metal ions and (toad), 39
effect on water intake of intravenous infusion of (rat), 331
Antidiuretic substance, release by bradykinin of (rat), 403
Arterial walls, mechanoreceptors in kidney (rabbit), 477
Avian iris muscle, ultrastructure and contractures of (pigeon), 253
Avian vibration receptors, responses in interosseous region of hind limb of (duck), 77
Axons, sodium transport by perfused giant (*Loligo*), 487

Basal cell potential, origin in cornea of epithelial (frog), 57
Bladder, effect of metal ions and antidiuretic hormone on oxygen consumption in (toad), 39
Blood–brain barrier, kinetics of ^{22}Na escape from central nervous system and (*Periplaneta americana*), 24*P*
Body temperature, performance on psychometric tests and deep, 17*P*
Bradykinin, kininogenase of coagulating gland and release of (guinea-pig), 341
release of antidiuretic substance by (rat), 403

Calcium, action potential in muscle cells and (amphioxus), 217
effects on miniature end-plate potential frequency during prolonged tetanization of (frog), 17
Carbon dioxide-sensitive receptors, lower respiratory tract (chicken), 35*P*
Cardiovascular responses, effect of changes in central command during isometric exercise on respiratory and, 40*P*
Carotid body, fine structural location of cholinesterases in (cat), 747
reflex responses to unilateral stimulation of chemoreceptors of (dog), 1
Catecholamines, effect on spontaneous contractions of mesenteric lymphatics of (ox), 34*P*
Cations, effect on oxygen consumption in bladder of antidiuretic hormone and various (toad), 39
Chemoreceptors, reflex responses to unilateral stimulation of carotid body (dog), 1
Chloride conductance, action of monocarboxylic aromatic acids on normal and myotonic muscle and (goat and frog), 367
Cholic acid, effects on transport from blood to bile of conjugation of (dog), 9*P*
Cholinesterases, fine structural location in carotid body of (cat), 747
Cholinesterase inhibitors, effects on neuromuscular function of acute and chronic exposure to (man and rat), 15*P*
Chromatic mechanisms, independence of temporal integration properties of individual, 611
Circadian cycle, control mechanism for hepatic tyrosine transaminase activity during (rat), 267
Coagulating gland, release of bradykinin and kininogenase of (guinea-pig), 341
Cornea, origin of epithelial basal cell membrane potential in (frog), 57
Cuneate nucleus, amino acids and presynaptic inhibition in (rat), 689

Discharge frequency, interaction effects of visual contours on simple striate neurone (cat), 659
Distal colon, excitatory input to inferior mesenteric ganglion from (guinea-pig), 443
Dogfish, neurophysiological research and, 12*P*
Dopamine neurones, gonadotrophin secretion and stimulation of tuberoinfundibular (rat), 385
Dorsal column nuclei, projection into spinal cord of cells of, 29*P*

Epithelial basal cell, membrane potential in cornea of (frog), 57

Erythrocytes, rouleaux formation and rate of packing of, 39*P*
Excitation–contraction coupling, muscle cell (amphioxus), 233
voltage clamp studies on ventricular (frog), 167
Extraocular muscle, development of isometric tension in (monkey), 155
Eye, independence of temporal integration of individual chromatic mechanisms in, 611

Falls, muscular control of landing from unexpected, 729
Fever, production by prostaglandin E_1 of (cat), 739
Foetus, non-electrolyte permeability of lung capillaries and alveoli in (sheep), 303
Folate metabolism, reproduction and, 16*P*
Frequency response, central vestibular unit activity on semicircular canal rotation and (cat), 191

Ganglia, studies with intracellular electrodes of (guinea-pig), 421
Gastric acid secretion, relation during gastrin and histamine stimulation between mucosal blood flow and (cat), 571
splanchnic nerve inhibition of mucosal blood flow and (cat), 555
Gastrin stimulation, relation between gastric acid secretion and mucosal blood flow during (cat), 571
Gonadotrophin secretion, stimulation of tubero-infundibular dopamine neurones and (rat), 385
Grating detection, effect of narrow-band visual noise on, 355

Haemoglobin, *in vivo* oxygen capacity of, 31*P*
Heart rate, long-term measurements in middle age of, 42*P*
Heat production, mechanical properties of latissimus dorsi muscles and (chicken), 281
Histamine stimulation, relation between gastric acid secretion and mucosal blood flow during (cat), 571
Hopping movements, control of, 709
6-Hydroxydopamine, effects on development of neurogenic hypertension of (rabbit), 20*P*
Hyperaemia, mediation in skeletal muscle of functional, 25*P*
Hypertrophy, compensatory renal (rat), 507

Ileum, inhibitory effect of perivascular stimulation on isolated (guinea-pig), 38*P*
Inferior mesenteric ganglion, excitatory input from distal colon to (guinea-pig), 443
studies with intracellular electrodes of (guinea-pig), 421
Interosseous region, responses of vibration receptors in hind limb (duck), 77
Intracellular potentials, spermatozoa (bull), 127
Iris striated muscle, ultrastructure and contractures of (pigeon), 253
Isometric tension, development in extraocular muscle of (monkey), 155

Kidney, afferent discharges from arterial mechanoreceptors in (rabbit), 477
Kidney, compensatory hypertrophy of (rat), 507
Kininogenase, release of bradykinin and coagulating gland (guinea-pig), 341

Latissimus dorsi muscles, mechanical properties and heat production of (chicken), 281
Leech, uptake of sodium and potassium by (*Hirudo medicinalis*), 10*P*
Leg movements, landing from unexpected falls and muscular control of, 729
Liquid scintillation counters, processing of data from, 4*P*
Liver, [Ureyl-^{14}C]tolbutamide and [2-^{14}C]-pentobarbitone as substrates for microsomal enzyme system in, 7*P*
Lymph, intracellular enzyme changes following skin grafts in (rabbit), 525
Lymph flow, healing and rejection of skin grafts and (rabbit), 525
Lymph nodes, mast cells in, 10*P*
Lung capillaries, non-electrolyte permeability in foetal alveoli and (sheep), 303

Magnesium, effects on miniature end-plate potential frequency during prolonged tetanization of (frog), 17
Mechanical properties, heat production of latissimus dorsi muscles and (chicken), 281
Mechanoreceptors, afferent discharges in kidney from arterial (rabbit), 477
Medulla oblongata, neuronal activity associated with ruminant forestomach motility in (sheep), 587
Microtubules, role in movement of adrenergic vesicles (cat), 755

Miniature end-plate potential, effects during prolonged tetanization of calcium and magnesium on frequency of, (frog), 17
Monocarboxylic aromatic acids, chloride conductance of normal and myotonic muscle and action of (goat and frog), 367
Mucosal blood flow, relation during gastrin and histamine stimulation between gastric acid secretion and (cat), 571
splanchnic nerve inhibition of gastric acid secretion and (cat), 555
Muscle cells, excitation–contraction coupling in (amphioxus), 233
Na and Ca components of action potential in (amphioxus), 217
Muscle spindles, relative effectiveness of intra-arterial injection and bath application of substances altering excitability of, 15*P*
without γ-efferents, 28*P*
Muscle fibres, ultrastructure and contractures of iris (pigeon), 253
Myoepithelial cell, activation in submaxillary salivary gland of (cat), 89
Myotonic muscle fibres, chloride conductance and action of monocarboxylic aromatic acids on normal and (goat and frog), 367

Nasal secretion (cat), 1*P*
Neostigmine, effects of prolonged treatment with, 6*P*
Neuromuscular junction, transmitter action at, 33*P*
Norepinephrine, effect on daily rhythm of hepatic tyrosine transaminase activity (rat), 267

17β-oestradiol, specificity of anti-sera to, 21*P*
Off-line analysis, method for increasing biological signal duration to facilitate, 12*P*
Oxygen consumption, effect in bladder of metal ions and antidiuretic hormone on (toad), 39

Parotid gland, secretory nerves of (dog), 463
Pelvic plexus, studies with intracellular electrodes of ganglion cells in (guinea-pig), 421
Pentagastrin, influence upon pancreas of hypophysectomized animals of (rat), 26*P*
***p*-nitrophenylphosphate hydrolysis,** increase on lowering ionic strength of red cell membrane, 22*P*
Poison glands, fine structure of cutaneous (*Xenopus laevis*), 9*P*
Presynaptic inhibition, effects of amino acids on cuneate nucleus and (rat), 689
Prostaglandin E_1, fever produced by (cat), 739
Receptive fields, spatio-temporal aspects of discharge centres in simple striate neurones and (cat), 625
Ruminant forestomach, medullary neuronal activity associated with movements of (sheep), 587

Secretin, influence on elimination of drugs in bile of, 13*P*
Secretory nerves, parotid gland (dog), 463
Semicircular canal, neural frequency-response in vestibular nucleus to rotational stimulation of (cat), 191
Skeletal muscle, mechanical properties and heat production of (chicken), 281
Skin grafts, lymph flow and changes in intracellular enzymes following (rabbit), 525
Sodium, action potential in muscle cells and (amphioxus), 217
Sodium transport, perfusion of giant axons and (*Loligo*), 487
Spermatozoa, intracellular potentials in (bull), 127
Spinocervical tract, effects of descending impulses on transmission through (cat), 103
Splanchnic nerve, inhibition of gastric acid secretion and mucosal blood flow by (cat), 555
Stepping movements, control of, 709
Striate cortex, interaction effects of visual contours on discharge frequency of simple neurones in (cat), 659
receptive fields of simple cells in (cat), 625
Submaxillary salivary gland, myoepithelial cell activation in (cat), 89

Taenia coli, changes following transplantation into the anterior eye chamber of (guinea-pig), 139
Temporal integration, individual chromatic mechanisms in eye and independence of, 611
Tetanic stimulation, effect of calcium and magnesium on miniature end-plate potential frequency during prolonged (frog), 17

Thalamus, responsiveness to visual stimuli of single neurones in (cat), 32*P*
Transplantation, changes in taenia of the caecum following (guinea-pig), 139
Tubero-infundibular neurones, gonadotrophin secretion and stimulation of (rat), 385
Tyrosine transaminase activity, central neural regulation of daily rhythm of hepatic (rat), 267

Urinary composition, effect of food and water deprivation on renal and (rabbit), 18*P*

Vaginal epithelium, action of pituitary hormones on bioelectric parameters of, 19*P*
Vasopressin, effect on blood platelets of, 36*P*
Ventricle, voltage clamp studies and excitation–contraction coupling in (frog), 167
Vestibular nucleus, neural frequency-response to rotational stimulation of semicircular canals in (cat), 191
Vibration receptors, responses in interosseous region of hind limb of (duck), 77
Visual contours, interaction effects on discharge centres of simple striate neurones of (cat), 659
receptive fields of simple striate neurones and responses to (cat), 625
Visual noise, grating detection in narrow-band, 355
Voltage clamp, evidence for excitation–contraction coupling in ventricle from (frog), 167

Walking forces, platform for measuring (ox), 2*P*
Water intake, effect of intravenous infusion of antidiuretic hormone on (rat), 331

XUM
